Iacobucci HF Aerospace seat lineup for private jet: beyond extraordinary.

May, 20th, 2014 – Ferentino (FR) ITALY. Only 4 years after its first prototype seat launched in 2010, Iacobucci HF Aerospace will display at EBACE 2014 in Geneva (Hall 5, Booth 3623) its latest lineup of 16G tested and fully certified VIP seating products: two refined and bespoke mechanical seats for narrow and wide bodies aircraft and three electromechanically actuated seats. All recline in a bed mode, in full flat position. The three electrically actuated seats are surrounded by shells with all the VIP features and amenities. All seats are fully customizable and provide VIP customers with one of a kind Italian style and craftsmanship, supported by high quality products for installation on board their private jets.

Iacobucci HF Aerospace, will present in Geneva, during **EBACE** exhibition, **Hall 5, Booth 3623**, its full lineup of innovative VIP seats. The seats are highly personalized and specifically designed to meet the increasing demand of private jet customers for unique, exclusive products and for extra-ordinary experience on board. The transalpine manufacturer of seating products for private jets is synonymous of best in class for comfort, refined elegance, Italian craftsmanship and exceptional quality.

The **Iacobucci HF Aerospace Super Lounge Seat** named **Venezia** has been conceived and designed to offer the maximum comfort and privacy on board. Equipped with an hi-low surrounding partition and sliding ottoman, the seat has a spacious entrance width and different features/options to provide the best in class comfort for the most sophisticated clientele in the VIP market.

The seat offers an IFE system with USB port, a 27" monitor, backlit PCU/Audio Jack and many other features such as in-arm one leaf table, a cup holder, a reading lights and a life vest compartment. The electrical privacy partition panel and the multiple switch controlled seat adjustments enhance privacy and comfort on board for the occupant. The seat displays symmetric and simple lines, with different cushion thicknesses studied around human ergonomics for the ultimate comfort, completed by a mix of double and single stitching with piping around the shape of the seat upholstery.

Certified and already installed on BBJs, the **Iacobucci Hf Aerospace Double and Single Shell** boast outstanding engineering, refined craftsmanship and innovative features. The **Double Seat** named **Roma** is fully electromechanically operated with a wide range of possible movements managed by the actuator software, allowing to assume different configurations from upright (TTOL) to full horizontal flatbed position. The shell seat range for large VIP aircraft is completed by the **Single Shell** seat named **Milano**. The seat, available on catalogue, is a one of a kind unit which was developed to be installed for different aircraft configurations. The seat has a large single shell fully electromechanically operated that enhances a premium flying experience delivering top class high quality solutions for the most demanding VIP customers on board their aircraft.

For the mechanical seat range, **Iacobucci Hf Aerospace** will display at EBACE the **Single Mechanical Seat** named **Alba**, a VIP single seat which combines maximum comfort with top quality finishes and highest level of personalization. The seat structure design was strongly influenced by our customers and the latest seating market trends, both in terms of product specifications, functionalities and options. The mechanical 360° swivel enhances the useful space into the cabin while providing extreme comfort with features like the extended heel-kick foot-rest or the PCU switch panel. The

graceful shape, the meticulous attention paid for each detail and unique attributes made the Alba VIP Single seat an immediate success in the marketplace.

Iacobucci HF Aerospace will finally present the **Double mechanical Seat** named *Portofino*, a double seat of unique quality designed to meet the highest business jet market needs and requests. Echoing the same technical features as Alba, the double seat is equipped with a 360° swiveling mechanism, with the standard lateral and longitudinal movements to enhance the useful space into the cabin. The choice of foam is based on ergonomic standards, while soft dressing leather materials are available in different tones and shades.

About IACOBUCCI HF Aerospace

The company is worldwide leader in the development, production and distribution of galley inserts, trolleys and Seating products for both commercial and business aviation.
