The New Superlight Full-Size Cart, ONLY 14,850 kg

9 April 2013 – Ferentino (FR), ITALY. *Iacobucci HF is pleased to display - worldwide premiere at AIX 2013 in Hamburg - its **New Superlight Cart Line - FULL-SIZE ONLY 14,850 kg.** A new food & beverage trolley which sets the bar higher for all competitors.*

Since the takeover of the trolley business for aviation in 2010 from old family company, Iacobucci HF has worked at the development of a new lightweight trolley of top quality performance and durability. The company has heavily invested in the research and testing of new design and materials to answer airlines' new needs and demands. The Iacobucci HF new Superlight Full-Size Cart for Commercial Air carriers which ensures **quality** - a backbone of Iacobucci trolley system for 40 years - **lightweight, customization, endurance and low cost of ownership** is the right response to those questions.

The new Iacobucci HF Super Light Cart, Full-Size in ATLAS standard, **only weights 14,850.** "It is one of the lightest cart available in the market today and above all it represents the toughest, durable lightweight trolley in the aviation" **Pascal Jallier, newly appointed Head of Sales & Programs**, comments. "The new Superlight Cart can be ordered with **first deliveries on the second part of the year.**

The new cart is a combination of **aluminium** and **composite** material thus ensuring maximum strength and product lifetime. The modular structure design ensures easy repair and parts substitution in addition to the possibility to add features and accessories based on customers requests. "The New Superlight Full-Size Cart has a **new double latch feature**, improved wheels and breaking system and **increased thermo properties** thanks to the new composite material used for **customizable side panels**" Waldo Santilli, Head of Design Organization, says.
