Iacobucci HF: the New BBJ Seat Ready to Fly

4 April 2013 – Ferentino (FR), ITALY. *The Iacobucci HF Seat division has successfully completed the official test campaign (EASA and FAA certification) for its 16G Forward and AFT facing for BBJ. "The new seat is now available for all BBJ customers seeking for an innovative product of superior quality, best in class in comfort and with a Made in Italy design" says Pascal Jallier Head of Sales and Programs, who recently joined Iacobucci HF in Italy.*

The Iacobucci HF seat has entered **the company product catalogue** and is available for BBJ installation. The migration onto the ACJ platform is running in parallel and currently considered on several VIP programs. The dynamic tests were conducted at TÜV Rheinland TNO International in The Netherlands along with the EASA witnessing. Furthermore the company has brilliantly completed the Oil Burner Test on premium leather and foam combination for the first BBJ ship set delivery.

The first BBJ ship set will be flying in few weeks. This seat model for BBJ customer features high quality stitching and upholstery design details made by the artisans that give the Italian luxury brands their reputation. The seat *has* 21" - 23" in between armrest width, mechanical tracking and 360° swivel capability, a wide and comfortable backrest with personalized recline mechanism, including flex-wing headrest that provides a wide range of adjustments. The Seat guarantees a maximum comfort in all positions thanks to a 9" extendable leg rest, foldable manual footrest (allowing a total seat length in full flat bed position of 6.5 ft or 198cm), styled armrests with in arm table and PCU. "The seat, ergonomically adjusting to the human body form, delivers best in class comfort while the light structure and effortless movements makes it easy to be installed and maintained reducing operation costs" concludes Pascal Jallier.
