

## IACOBUCCI HF Group: NBAA 2011 show preview.

**23 September 2011 – Ferentino (FR), ITALY.** IACOBUCCI HF Group, worldwide leader manufacturer of galley inserts for commercial and business aviation, *will exhibit at the NBAA 2011 Las Vegas, from the 10<sup>th</sup> to the 12<sup>th</sup> of October 2011 (Northen Hall, Booth N2526) presenting its latest innovative products.*

NBAA's Annual Meeting & Convention is the year's most significant event for the business aviation industry, the right occasion for the Group to introduce its novelties together with all its main productions dedicated to the Business Jet market: from Coffee & Beverage makers to Trash compactors, from the entire line of Induction ovens, Microwave and Cooking station developed by MGS, to the VIP Trolleys (Folding, Full-size and Half-size) and Standard Units and to the recently launched VIP seat division.

The main focus will be on IACOBUCCI HF Seat department that will be exposing both its **21 & 23 inches VIP Seats** that thanks to a sleek modern design and the use of premium materials, are the most exclusive choice for private jet customers. Unique products that exude quality and promise a premium flying experience whilst balancing innovation and progressive styling. The latest of the two seats has been developed enhancing the concepts expressed in the first prototype, designed with the collaboration of BMW Group DesignworksUSA, in order to respond to the different technical and styling needs of the clients. The new business division, created by IACOBUCCI HF to manage this new product line, thanks to a market driven approach and a transparent and customizable options for OEMs is moving fast to become a main player in the high-end of the aircraft seating market.

Together with the Seat division a great attention will be reserved to the **brand new Microwave produced by MGS, Modular Galley System company**, a wholly owned subsidiary of the Group. This compact, high-technology and innovative product was conceived to complement the successful MGS induction oven series, the **Multi Functional Unit and the Cooking station**, which have brought to the market a new dimension of food on board for both commercial and general aviation. This brand new product is extremely light, with only 14 kg of empty weight, and is the perfect complement to rapidly reheat every kind of food. The microwave has an optimized internal volume with over 12 litres of cavity capacity to maximize usability.

At the expo together with the new microwave, the group will display the MGS Multifunctional Unit series and the cooking induction top. The MFU unit has gained three Mercury Awards, thanks to its

ground-breaking heating technology that uses the induction technology for steam cooking: induction significantly speeds up the cooking process, while steam conserves vitamins and retains appetizing colors, preventing drying out of ingredients allowing the real gourmet experience for passengers on board. The variety of the Functional inserts allows to broil fish and meat, fry eggs or toast bread, steam vegetables or cook pasta and rice. The smart programming system with automatic processing coupled with innovative heating technology and special attention to materials ensure simple, convenient and safe handling for the operator.

Will complete the gamma at the show IACOBUCCI HF historical products dedicated to the Business Aviation: both the Espresso and Coffee makers and the Trash compactor series. The **IACOBUCCI HF espresso, cappuccino and tea makers** (both 28V and 115V) are all developed with a focus on convenience, reliability and easy use. They all utilize the patented heat exchanger technology instead of traditional water boilers, allowing a non-stop brewing cycle and the consecutive use, without waiting the water reheating cycle. The **Trash Compactors** series was specifically designed to provide the most efficient performance with the lowest power consumption in smaller dimensions: they combines two tons of compacting force with low power consumption. Able to compact plastic, aluminium cans, plastic and tetra pack significantly reducing waste volume.

The complete IACOBUCCI HF gamma of galley inserts and cabin equipments is developed to meet all customer needs in the Business Jet market making the Group an essential reference point in the industry.

---
