Iacobucci HF, introduces its new 28V espresso maker

May 14th, 2012 – Ferentino (FR), ITALY. Iacobucci HF Group worldwide leader manufacturer of galley inserts for commercial and business aviation, presents at EBACE 2012 its new Espresso machine to the business jets market. The new unit thanks to the use of light materials and latest technologies offers the best espresso in style, a top class reliability with a significant reduction of weight. Quality, design, lightweight and functionality are the main drivers of a worldwide success: the Iacobucci HF Espresso systems.

The Iacobucci HF espresso series, selected from 90% of the world airline companies for the offer on board their First & Business Class service, have been for years the first choice of business jet customers around the world. The great reliability of its machines and the superior espresso quality whatever espresso brand you use have made Iacobucci HF widely recognized through the years as the unreachable leader of espresso makers in the world and the favourite choice among business jets customers, royal and Governative aircrafts.

This new machine (P/N HFESBAA28), as all Iacobucci HF machines does not work with a boiler but with patented heat exchangers, which ensure instant and continuous operation without any waiting time for re-heating the water after each use. Thanks to the absence of water boiler, plus a more advanced technology, the Cappuccino & Espresso Coffee Maker is notably lighter than its competitors.

This new product also features an open system allowing to use all ESE (Easy Serving Espresso) pods. **The open system offers numerous advantages: FLEXIBILITY** - the ESE capsules are the worldwide industry standard for coffee pods and are consequently available from all the main roasters. This gives the possibility to use any kind of blend. **CUSTOMIZATION** - the pods can be offered in a personalized packaging and blend. **EASE OF USE** - The perfect coffee is served at the touch of a button.

The main features of the HFESBAA28 Espresso and Cappuccino Maker are: incorporate drain, a new elegant black "rounded" front panel design, new flashing icon system, new materials less sensitive to heat and modern look ergonomic handle, backlit lighted panel, flow meter for precise brewing quantity, pressure sensor, new latch mechanism, new modern spout adapter, new handle locking system, new generation electronics hardware and software, new and lighter plumbing system and new and lighter heat exchanger.

Important innovations that ensure a premium class **RELIABILITY** and extremely high performances yet **LIGHTWEIGHT**.

Iacobucci HF Group, headquartered in Ferentino (FR) – Italy, is a worldwide leader, manufacturer and supplier of galley inserts. It includes the companies Iacobucci HF Electronics, Iacobucci ATS - Aircraft Trolley System, Iacobucci MK in Lecce – Italy, MGS AG a German subsidiary, supported by 17 international certified repair stations.
