

# K | SYSTEM

Iacobucci HF, the market leader in aviation coffee machine, launches a revolutionary built-in in coffee system specially design for luxury yacht. Thanks to its engineering know-how, excellent Italian craftsmanship and proprietary technologies achieved developing and manufacturing products for aerospace industry, the Company has developed a system which provides the highest level of integration and easy installation on board.

K|System is a compact built-in coffee system with a width of 30 cm, composed of two interconnected elements: Nespresso coffee machine and special flexible module with a separate water reservoir and cup warming storage, which together guarantee the perfect temperature of coffee cups and superior quality of coffee.

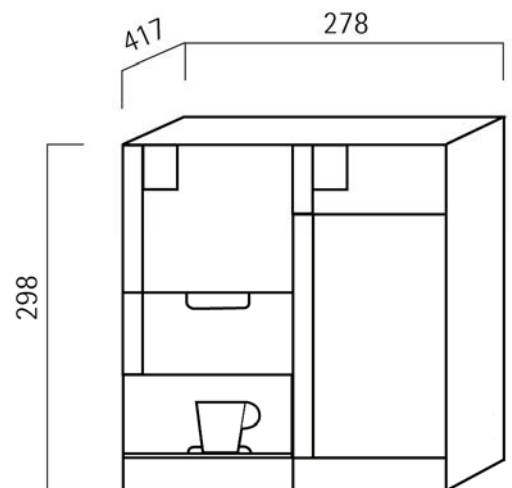

Made in partnership with Nespresso, offering a variety of profiles and aromas with its range of 8 Grand Cru coffees, categorised by cup size and level of intensity to match individual preferences and tastes. The linear design of the K|System combined with the button-less sensorial control panel provides a simple and intuitive operation of the machine for pure enjoyment of the coffee.

K|System is available in three colour variations: Ivory white, Ultimate black or Satin silver.
